NEEDS WORK

Coach's framing

OVERALL

4.08

▲ 0.05 vs last 6

🎯 Top priorities to work on

In order — most impactful first. Drilled and prescribed by your coach.

1 Get serves landing deeper

52% DEEP · NEEDS WORK • showed up in 3 of 4 games

Your serve depth has dropped to **52%** over these four games. When the return team's getting it back at the kitchen line consistently, you lose the serve-side advantage from the first ball. Most short serves landed in the middle third — not faulting, just not pushing back.

Serve deep · 52% | Kitchen on serve · 41% | 5 flagged moments → | 3rd-shot drive trend ↑

Drill: 25 serves with cones at 28 ft. Target 70% deep before next session; expect 2–3 weeks of focused practice to lock in. Pair with *follow-through-to-kitchen* footwork — they reinforce each other.

2 Close to the kitchen on the serve

41% KITCHEN ON SERVE · NEEDS WORK • across all 4 games

After the third shot you're sitting back at 6–7 ft instead of stepping in. The opponent's 4th shot is finding open court because of it. This compounds with the serve-depth issue (#1) — short serve + slow close = easy attack on the 4th.

Kitchen on serve · 41% | Player position y=12.0 · target 14.5+ | 2 review notes →

Drill: "split-step at the kick" — every time you serve, the moment your paddle releases the ball, take a hop forward. Run it until it's automatic.

3 Choose drop over drive on the 3rd

3RD IN · 81% • games 2 + 3 specifically

You drove 9 of 14 third shots in these games — 4 of those got you attacked on the 5th. Drives only work when your team is actually closing up; right now (see #2) that's not happening, so the drop is the safer ball.

3rd drive: 9 · 3rd drop: 5 | 5th-shot reset rate: 35% | 2 sequences →

Drill: coach-fed returns; alternate "drive 5, drop 5, drop 5, drive 1" to retrain the default response. Goal: make drop the unconscious choice when you're out of position.

4 Stay patient in the dink rally

SHOT-IN 81% • 2 of 4 games

Three rallies ended on a low-margin speed-up that didn't land. The previous shot was actually a great dink — patience would have earned you a better pop-up to attack.

Speed-up loss rate: 60% | 3 flagged →

Drill: "no speed-up under shoulder" — drill 3-minute dink rallies where you can only attack a ball above shoulder height. Builds the patience habit.

5 Reset against direct attacks

DIRECT DEFENSE · 67% • game 4

When attacked at your sideline / body, you're countering hard ~70% of the time. Resets back into the kitchen reset the rally and force them to start again. Good ones too — but you only chose reset twice across these games.

Direct defense beats: 4/12 | Reset count avg: 0.5/game

Drill: coach feeds 8 mph body shots; goal: paddle out front, soft hands, ball lands kitchen-side of the line. 50 reps a session for two weeks.

Coach's notes

GAME 01

Best version of you tonight. Patient when it mattered, took good drives off the bounce, kitchen pressure was real. Keep this energy.

GAME 02

Started impatient. Two unforced speed-ups in the first three rallies set the tone. Need a reset routine between rallies.

GAME 03

Solid recovery. The drop on rally 7 was textbook — that's the play.

▼ Drill-down stats

🚀 Serve depth distribution

Where your serves land · 4 games combined

Out / Net	13%
Shallow	11%
Medium	24%
Deep ✓	52%

🏠 Kitchen arrival

Did you get to the kitchen line in time

On serve (you)	41%
On serve (partner)	64%
On return (you)	88%
On return (partner)	91%

🎯 3rd shot tendencies

Shot type chosen on the 3rd, and the outcome

Drive · won	5/14
Drive · lost	9/14
Drop · won	4/5
Drop · lost	1/5

🎨 Play style mix

What shots you choose when you have options

Drive (offense)	51%
Drop	29%
Dink	19%
Reset	1%

Recurring themes

Patterns the coach is watching across the session — separate from this session's top priorities.

Paddle face dropping early on returns

Problem: 7 of 14 returns went into the net — paddle face was below the ball at contact in 5 of those. **Solution:** ball-on-string drill at the wall; keep paddle face up through contact for 50 reps.

Late split-step on serve return

Problem: you wait for the bounce before splitting. Costs you a step toward kitchen. **Solution:** split with the opponent's contact, not the bounce.

Shot-target communication with partner

Problem: 3 rallies in game 2 ended with both players hesitating on the same ball. **Solution:** verbal "mine" / "yours" call before every middle ball.
